

Project: Chemical Line Gate Valves

The Problem

This gate valve had become severely pitted and corroded after years of use.

RPT and Thortex were called in to ...

The Solution

Abrasive blasting cleaned the surfaces to a near white metal finish. RPT used **Thortex Chemi-Tech UC Paste** and **Thortex Chemi-Tech UC** to coat and protect the valve from further chemical attack.

Thortex Chemi-Tech UC and **Thortex Chemi-Tech UC Paste** offer excellent adhesion to steel and concrete and have outstanding resistance to a wide range of industrial chemicals even under total immersion conditions. They are solvent-free coatings designed for use where exceptional resistance to chemical attack is required.
