

Project: Power Plant Walkways

The Problem

This power plant needed to fulfill its OSHA guidelines for safety surfacing throughout the plant.

RPT and Thortex have had a presence in this plant for over 10 years.

The Solution

Thortex Floor-Tech HB and **Thortex Grip-Tech** yellow were used throughout the plant. Both products have had proven success record in this plant.

Thortex Floor-Tech HB is a high-performance, solvent-free, epoxy coating designed for an optimum level of adhesion, abrasion, impact and chemical resistance which provides excellent long-term protection to industrial floors operating in aggressive environments.

Thortex Grip-Tech is a high-performance, solvent-free, slip-deterrent system for mineral and metallic surfaces.
